

# Rockdale County Public Schools

## Transportation Department

---

Dear Mr. Walthour,

Just wanted to say thanks for introducing me to FPC. As you know, the results from the test performed on 8 of our School Systems buses indicated that the fuel mileage increased an average of one mile per gallon (10-12%). That's a huge savings when multiplied by 190 buses in our Fleet.

The Rockdale School System has been using FPC for 4 months. We receive 4 drops of fuel a month on a normal basis, since its introduction to our tanks; we only received 3 drops last month. Also, 2 drivers commented to me that they were not fueling their buses as often. These drivers were not aware that we were using your product.

Again, just wanted to say thanks for introducing us to FPC and to let you know that I'm excited about what I've seen so far.

Dwayne R. Allen
